European Joint Action on Cancer Screening

Co-funded by the European Union

EUCanScreen is a European project that aims to contribute to reducing cancer mortality through the development and improvement of screening programs.

ULS São João is part of this consortium of 29 countries, participating in the preparation of the necessary conditions for the future implementation of lung cancer screening programs.

EU CanScreen
European Joint Action on Cancer Screening

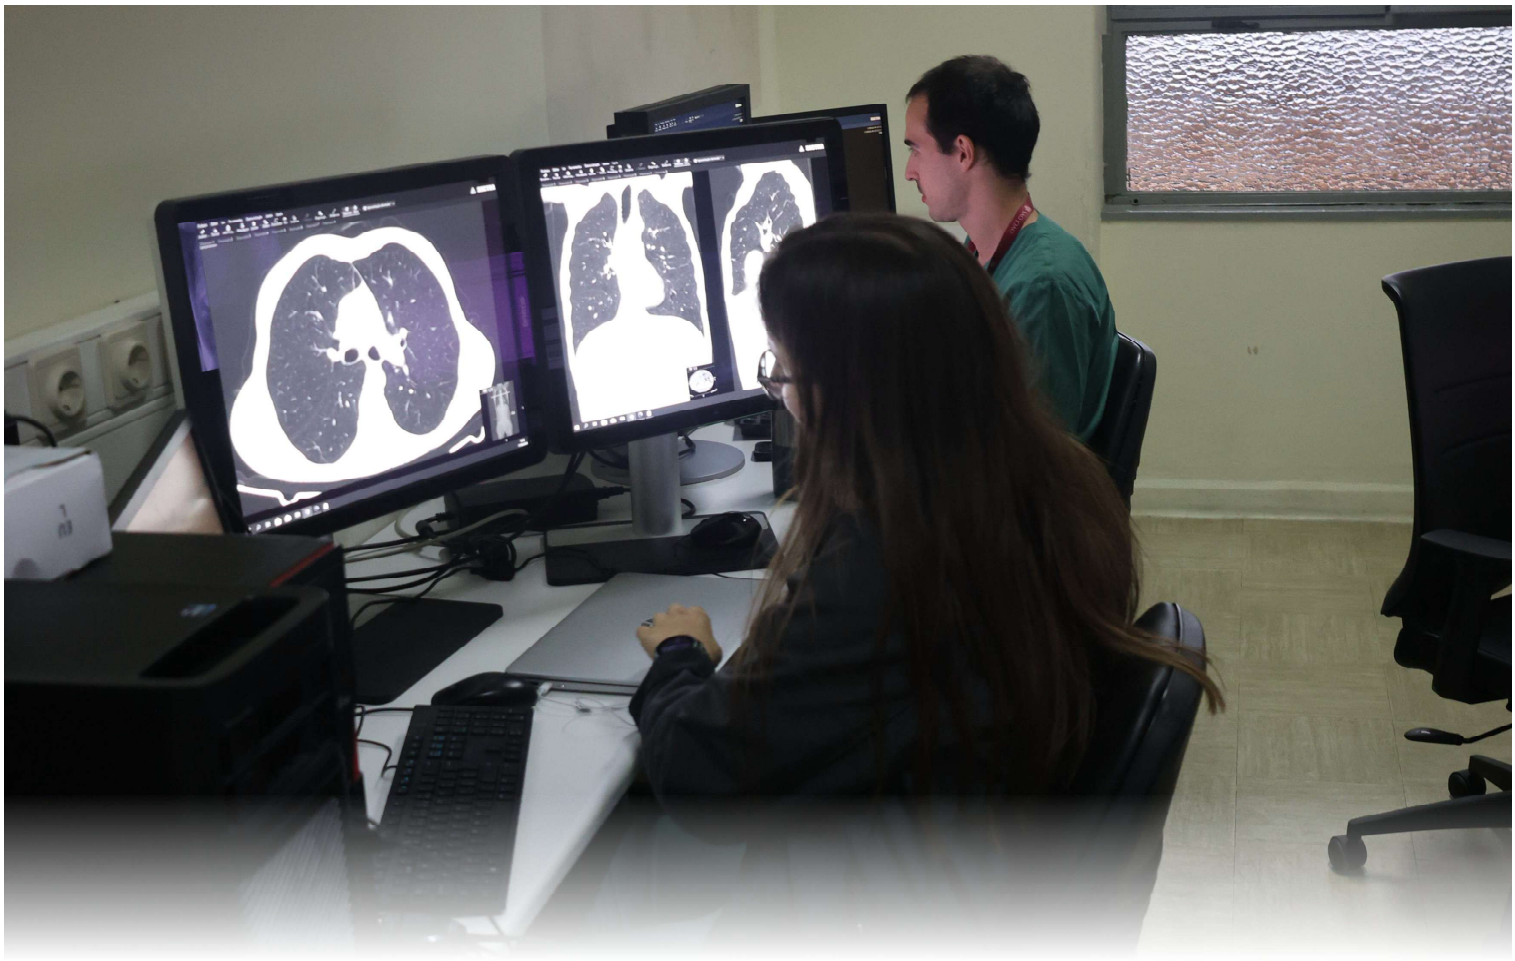

Co-funded by the European Union

Within the scope of this project, ULS São João is promoting actions with healthcare professionals on topics such as eligibility criteria, shared decision-making, smoking cessation, and care pathways.

The objective is to empower professionals and prepare procedures and pathways, and not, at this stage, to carry out screenings on the population.

Co-funded by the European Union

This preparation involves professionals from Primary Health Care and different hospital specialties, promoting a multidisciplinary approach and greater coordination between teams.

Preparing today to be able to implement, in the future, safe, coordinated and high-quality screening programs.
