EU CanScreen
European Joint Action on Cancer Screening
Co-funded by the European Union

SOLACE+ aims to support European countries in the design, implementation, evaluation and improvement of future lung cancer screening programs using low-dose computed tomography.

Quality, professional training, data integration and artificial intelligence are some of the areas worked on in the project.

EU CanScreen
European Joint Action on Cancer Screening

Co-funded by the European Union

The participation of ULS São João in these European projects allows for the preparation of professionals, knowledge and organizational models that may support, in the future, the implementation of lung cancer screening programs.

Today, we prepare knowledge.
Tomorrow, better health responses.
